

SAINT COLUMBKILLE

“I am Saint Columbkille.

**T**here are so many different types of living matter and things present upon the earth. The most precious of these, of course, is human life, because human life is gifted with a Soul. Many cannot understand the value, the truth, the reality, having a Soul, because they cannot see It nor can they feel It, nor can they sense Its Existence in any degree.

**W**e hear some say: ‘I understand I have a Soul, and It is the Portion of me that will be returned to The Father, The Creator, at a given time, but my physical must die first. This is frightening. Why does not my physical remain existing because it is a portion I see, I feel, I use, I understand and, in many ways, represents me?’

**T**he Father has given to the world a Gift bearing so many Lessons, so many degrees of Instruction on the importance of human life, what it consists of and, of course, the Goal for which it is created. Very little instruction is emphasizing all there is to know regarding the human being’s Purpose or Goal. Many learned men and women stress facts they feel are necessary for individuals to think about, to more fully understand, but most of this is around the human values, practices, limits as man.

***When this Gift of Divine Love bearing the Name of The Beloved Saint Joseph was first given, and so many Saints joined in speaking through It, encouraging those who would one day read the Words, to more fully understand that life as a human being, as man, was the Greatest Gift, because in its full Matter, Means, Goal, it was instilled with the hope, the***

***practicality of understanding that there was more to life as a human being than showed.***

**C**hildren are not being instructed on the importance of everything they do, say, think, partake in, and very little is spoken against sins of the flesh, causing impurities to the Soul.

**T**he Father chose this time to use only one voice, but for this to be imitated by millions used to spread All that would be delivered, and was delivered, for the sake of Souls.

**W**e hear individuals say that when something occurs that is not nice to see, or it has a tragic ending, they feel the impact of what occurred. This thought should enter everyone's head when they are the participant in a sinful act that in some way damages their Soul, because the Soul is an innocent victim of all that a human being speaks, practices, and relays to others, that could be detrimental to all the Souls of everyone involved.

**T**his subject matter is important, because it is not a common subject matter, due to the fact that even the greatest theologians, in their concepts of what they have read, do not always see the importance of every word that a human being partakes in, or is the recipient of, regarding certain acts.

**I** could speak hours on this subject because of the Importance of it, but it is important that what little I have spoken is brought to the attention of many, many who have no access when We speak through one voice. It is important that the Words that have been put into script be delivered throughout the world, in spite of any verbal or written attack.

**A**s I leave you, I beseech you, let nothing stand in your way in

delivering All that has been spoken and put into script, because there are many Souls at stake. Think of this also, ***what sadness it is in your daily life to become a victim of what someone says, someone does. Your Soul and Souls of others are the victims of many things that occur through a human act, actions, or expression that is impure.*** So be it.”
