

SAINT JOAN OF ARC

“I am Saint Joan of Arc.

In the time I lived things were much more difficult, because each area of life had their own goals, rights, and that is why there was so much to go to battle for.

The world has been blessed abundantly, and it is important that human beings of all ages more fully understand that all through time human life had to fight difficulties to rise to the top successful, oftentimes using physical help.

Today the world has been given a Gift of The Father's Love: so much Instruction on human behavior, plus so much Information on the Beautiful Gift of Divine Love, called the Soul.

So many so-called learned men ignore the importance of what human life was created for, and they place much emphasis on humanistic goals. Granted, thousands and thousands and thousands of Words have been delivered through one voice, constantly instructing human beings of the importance of human life, because of a Portion of it that is a Portion of The Father Himself.

The little one that is used to pass Our Words on to you who will read these Words, has a very responsible task, because of the Importance of the Words that, in many ways, are necessary in a Form of Teaching, Instructing, Instilling, on the Important Portion of human life called the Soul.

The Soul to human life is never seen, but It is obviously present

because of the innate understanding each human being has that there is a Goal within them that they cannot truly explain, but the Goal is evidenced by the intellect of the human being understanding that human life was created for a Purpose, thus giving to each individual something to look forward to, something to work for, and something to feel that there is a Goal beyond what anything else has.

As I speak these Words today, they are Words of deep sincerity and Divine Love, because it is important that each day be greeted with hope, and with the ability to remember that human life has been gifted over and above all other living matter or things. ***The Soul is evidenced by the very fact that the mind of a human being automatically says there is a Hereafter.***

As I close My Words, I know that though What I have spoken is different in content than some would expect It to be, I know My Words will hand to some, hope in a manner and a way best for them to receive. So be it.”
