

SAINT TERESA OF AVILA

I am Saint Teresa of Avila. There are many subjects that should be considered important for all lifestyles of human beings.

In many ways, the world has changed, but it is important for all human life to remember that they were created by The Divine, and it will be through The Divine that their Souls will be judged.

We hear many say, 'What can a judgment be?' It is important for all ages to more fully understand that as they live in the human form, they have within them a Gift of The Father's Love that gives each human life the strength, the courage, the perseverance, the endurance, and the ability to learn more about the importance of life, and to be able to handle all the aspects that occur, physically, mentally, morally.

All ages of human life try to ignore what they feel will put pressure on them regarding their moral values, moral standards. They must learn that it is not pressure that they feel, but an innate understanding of value that gives strength, hope, endurance, and ability to make judgments that are moral, instead of pleasing to the enemy by being immoral, impractical in sound purity of the mind and the body, for the benefit of their Soul.

Each day Many of Us wait for The Father to direct Us to speak on important subjects, so that human beings will better understand, and more reasonably acknowledge the importance of human life, because it has a Divine Goal. It is a sadness when We hear rejection or omission to what is important. If it was to be something materially gained, the thoughts would be evident for wanting successful results.

There is no greater Gift of Divine Love than the Soul that each human being is the custodian of, so Everyone Here in the Heavens pleads with human beings of all ages, all degrees of intellect and Faith, to remember, as you are responsible for this Gift of Divine Love, your Soul, you must remember that the Soul not only desires to return to The Father, but constantly pleads with The Father on your behalf, as well as Its Own, to give you the strength to do His Will in all decisions, in all aspects of life, because to return the Soul to The Father for All Eternity is a Blessing beyond what the human mind can comprehend.

Remember All that has been given, because The Father Wills It So.”
