

SAINT CATHERINE OF SIENA

“I am Saint Catherine of Siena.

Mercy is rarely thought about in its full meaning, especially when an individual ignores the value of it at given times. ***Mercy is a word, but in reality it has an in-depth meaning.***

Biblical History openly speaks about how unmerciful human beings were to The Son of The Creator. It was part of their nature, and definitely part of the act to cause pain, even though it was unjust to the One they were jealous of.

Today, throughout the world, little mercy is extended or practiced when there is a great need for it, either physically, mentally, or spiritually.

I speak differently today, but My Words are of Great Importance, because They are Words to awaken the minds, the sensitivities, the rationalization that human beings should become very aware of, and use acts of mercy instead of acts of injustice, egotism, or revenge.

Prayer is not one of the most popular actions of human beings, because they omit the fact that prayer can be said silently. ***No one has to know that one is communicating in this way with The Divine.***

Children are not being instructed on silent prayer, but children are not being instructed on many ways to become more sincere; not just practical, but more sensitive to what is going on.

If I were to give you the hours of the day in number, of how much prayer is spoken in a personal way to The Divine, you would be shocked at the comparison of this to all the other things human beings are involved with, on, for, because of the human side being more apt to be available.

There are so many words that could describe the vacancy in human lives every day, due to the fact that everything is either materialistic, humanistic, or based on totally self-concern. The word 'concern' obviously covers many facets of human life.

I will close My Words now, but hopefully They will be spread so others may have something to think about regarding their way of life, and the need they have to change what they call their human way, and think more about the necessity for the mind and the body, the senses, the intentions, and the associations with other human beings to have a spiritual connecting link to everything they do, everything they say, everything they feel, everything they wish, because without the spirituality human life is empty, ***because the mind, no matter how brilliant it is, cannot compete with the Importance of the Soul, and all the Soul is capable of participating in, for the human mind to make better decisions, or to be helped in a fuller understanding that The Creator is a Portion of the Soul, The Creator of All Things.***

I could speak hours on this Important Subject, and perhaps I will at a later time, but All that has been delivered through this Gift of Divine Love should be passed throughout the world, and never kept behind walls where no one can see, read, or more fully understand what a privilege it is to be born the human way, because of the Soul that is within each human being.

The Soul, as a Portion of The Creator, is a Gift of Divine Love Greater than any gift a human being can acquire. So be it."
