

SAINT ATHANASIUS

“I am Saint Athanasius.

Too few people throughout the world care to think about the importance of how they live daily life. So much is taken for granted, and so much accepted that, in many ways, is not beneficial to one’s morality, one’s spirituality, one’s understanding that The Father sees all, because of the Souls that are involved in every human life.

It is sad for me to say, that to most people the Soul is not accepted because It is an indefinable word that is difficult for people of all ages, all backgrounds, to value, ***even knowing that It is a Portion of The Creator of All Things.***

Sometimes We hear an individual say, ‘I have a pain in my side.’ They immediately connect the pain to that portion of the body that they know, or feel, or accept as being in that spot.

Now I take you to your mind. The mentality of human life is beyond what a human being understands it to be. It has multiple Gifts, because The Father instilled into human life what is called a mentality. The mentality is capable of understanding, through the process of hearing, reading, and other ways of learning things that nothing else created has the ability to do; also, the memory is a Gift of Divine Love, beyond what a human being of any degree of knowledge can fully understand.

Children are not being instructed on what a powerful Gift their memory is to them, for them, and it is through the memory, through the mind, that decisions are arrived at according to the mentality, the memory of a human being.

Now let me mention the word 'temptation'. Logic says that temptation, most times, is not for the benefit of one's practice in life, or for the Soul of the individual. It is important that human beings of all ages, all degrees of learning, all degrees of experience with others like themselves, learn to discern what is practical, beneficial, logical, ***because every human life is responsible to The Creator at a given time, for all they were involved in physically, mentally, emotionally, spiritually, in their lifetime.***

So Many of Us Here in the Heavens are anxious to speak through this Gift of The Father's Love that delivers so much Personal Concern for the Souls, and for the physical of all human life.

Children must learn responsibility in so many areas, because responsibility gives them strength when temptation enters their way of life.

I close My Words with a Blessing, and I say it in a way that, so many times, has attracted more attention than the words you use every day: ***In Nomine Patris, et Filii, et Spiritus Sancti. Amen.***"
