

SAINT THERESE OF LISIEUX

“I am Saint Therese of Lisieux.

The Father has given to the world a Gift of His Divine Love, beyond what a human mind can fully perceive the Magnitude of this Gift.

So much is taken for granted, and so much is put into a natural, informative understanding. Humanism, materialism and cooperation, when it is not for the best of the morality of all concerned, or for the good of the morality of all concerned, is taken for granted as being a natural act of human life. Justification abounds throughout the world on whether something is moral when it is totally immoral and, of course, the list is endless on this subject.

In this Gift that The Father has given to the whole world, it is sad for me to say that it will be a long time before this Gift is presented to other lands, other places where It is desperately needed. The human mind instinctively knows what is beneficial to whatever subject that is the point that is being spoken about, whether it be spirituality, morality, or the close relationships that people have with each other.

I speak on different subjects, because human life has been gifted with various ways to express, to partake, to divulge, to enlighten, ***and to be example of What The Father Wills for the Souls that each human being communicates with through their association with the physical portion of life.***

My Words are different, but it must be understood that human life, in so many ways, ignores what a Precious Gift it is. Human

beings refer to the cultures, the mentalities, the backgrounds, and many other facets that each human being encounters in their association with other individuals.

I speak differently today, but as We watch every day, human beings of all backgrounds, all goals, all talents, and all personalities, ***We try very hard to get them to use their free will, or I should say, so-called 'free will' in a beneficial manner for the sake of their Soul, that they are the custodian of, responsible for, and will be the Only Portion of them at a later date.***

Perhaps what I have spoken, some who read the Words will say, 'I am confused.' There is nothing confusing about what I have spoken. It is to alert all of human life, all ages, to be aware that all the gifts of human life have a purpose, a reason, but so many times an individual prefers to ignore what they know is right, and follow what they see others partake in, practice, or promote.

I could speak hours on the importance of the importance of the mentality of human life, but also, the responsibilities, due to the fact that every human being is born with the understanding of knowing what is right over what is wrong, what is truth over what is untruth, what is just over what is unjust; and also, that human life is different than any other living matter or thing, ***in that human life has a Goal that nothing else created has, and that is for the Soul to return to The Father, bearing the name of the individual in whom It was placed, but the Goal is Far Greater than the human mind can perceive greatness to be.***

As I close My Words, I know I have spoken differently, but hopefully some of the points that I dictated will give strength in areas that are needed, to give an individual the ability to more fully understand ***there is a Divine Plan in human life. It is The Father's Will for this to be understood, never ignored. There is a Goal Higher than the human mind can perceive a goal to be.***"
