

SAINT JOHN OF THE CROSS

I am Saint John of The Cross.

The Father, in His Love for human life, has many times given to men, women and children, another individual to instruct them on the importance of human life, and the manner in which they should follow to reach the Goal that awaits them.

There are many, many discontented human beings throughout the world. Very often the discontent is based on their lack of importance to others, their lack of sensitivity to others, their lack of knowledge about what others feel, think, say, practice.

In this Gift that bears the Name of The Beloved Saint Joseph, much has been addressed to all ages of life regarding the importance of life, and the Goal that it was created to reach.
The Father chose one small voice, not a loud voice, because a small voice will be heard easily with no strain to it, no dominance in it, but a perseverance that was necessary for those to listen to, and to better understand the beauty of having been born as man.

Throughout the world there is so little sound, truthful direction. So much of the direction is based on human opinion, human sensitivities, and human importance.

I will not speak long at this time, because What I have said is for all to read, and look at the Words in Their Meaning, and adapt the Full Meaning to their way of life, protecting themselves in many ways.

As I leave you, I bless you with The Father's Will, because it is His Will that will one day pronounce Judgment on how you lived your daily way."
