

SAINT ATHANASIUS

“I am Saint Athanasius.

I beseech all who read these Words to remember the Importance of Them. You must understand, in the human way, that you are surrounded by heretical views, practices and ideas. Heresy has many forms and, yes, many individuals involved in the different heresies, rarely showing to those who do not have heretical views, how they feel. They are very quick to close out anything that will release to others what they feel is important, and what is unimportant; the time of silence, such as this is, regarding what is morally sound, morally pure, immoral. There are many human beings that you would least suspect to be so heretically indoctrinated, and yet not show it to you when they are in your presence.

***Throughout the world heresy rings in and out of homes, businesses, and all other aspects of human life. Heresy can be devastating to the Souls of millions of human beings, because they do not recognize it when it is practiced right in front of them, because those who practice heresy are oftentimes discreet in how they use it, when they are with those who do not see things in this manner of way, practice or ideals.***

How I speak is different, I know, but What I have spoken is Important to be aware of, because the one thing that is always dismissed by those who are practical in their thinking, logical in their way of doing things, and then those who are opposite to these things, the Soul is the victim, not just the mentality. ***The Soul is victimized more than you understand It to be, because the Soul is present and wants only purity, goodness, and what The Father Wills, because the Soul is the victim of all an individual***

***practices.***

**I** will close My Words, but as I do, I plead with those who read Them: Be aware of your actions, be aware of your decisions, and be aware of those with whom you are with, because sometimes the enemy of The Creator uses so many ways to encourage the good to accept what is basically against The Father's Will.

***As I close My Words, I beseech you, be sure that what you think is right, be sure your decisions are pleasing to The Creator, and do not forget, your Soul is the victim of all you do, you think, and you speak.***

**M**illions of Words could be spoken on this subject, but What I have delivered to you thus far is to help you understand, some of the greatest intellectual human beings born make big mistakes in their desire to please people they meet, or people they are close to.

**I** end My Words in saying, '***God Bless you,***' because if you remember these Words, it will be important that feeling the will and the love and the desire for Him to Bless you, will give you the strength to overcome what others try to instill into your mentality and your way of life, what is wrong for your Soul that will return to The Creator. ***The Soul, hopefully, will be a Saint through how you handled all your actions, your will, and your decisions.***"
