

REVELATION DELIVERED THROUGH FRANCES M. KLUG
ON NOVEMBER 7, 2002 AT 12:49 P.M.

“We are pulling the little one in deeper, because of the Importance of All We have to say.

When the statement was made, that you who live now, live in a time worse than the history of Sodom and Gomorrah, many were shocked, but there was much indifference because the human mind could only think of the past, and not what the future might bring.

Ask yourself:

Who causes changes in human evaluations, values, perceptions and practices?

Who decides the moral changes, the immoral acceptances?

Who decides what is emotionally correct, or promotionally correct?

Who understands the full concept of the Commandments of The Creator through one man, and the Power of the Commandments, used to bring the Commandments that were first given, through thousands of years of different generations of human life?

I speak differently, but I beseech those who take My Words, and those who will read Them, to see the Importance that causes The Father to release such Wording to the human minds that can be reached through the printed word.

NOVEMBER 7, 2002 AT 12:49 P.M.

Personalities, natures, and humanistic evaluations are primary in everyday life. It is important that morality be the key that opens the door to every portion of human life, because it is through morality that the Commandments of The Creator will be remembered in their full concept, and not looked upon in a more general updated humanistic manner of thinking.

Children are not being instructed, or are they being given good example by the older individuals they are surrounded by. Too much is spoken impurely, and though the children do not respond immediately, it can be thought of as a learning process through the ability to hear, and it can be remembered at a later time that could cause vulnerability to the Souls that would hear.

There are so many words in the human way of speaking that are of more importance than those who think about the full meaning of what they say, what they express, what messages they leave for others to remember them by.

I speak differently, but I would want all who read these Words to see the value of the gift of speech, and what it can do to those who hear, those who will write what is spoken, those who will follow what appeals to them from what is spoken, and those who will follow physically, mentally, morally, what they heard or read because, you see, every day is a learning process, whether it is accepted as that or not, so it is important that how you represent morality should be thought about in every manner of your way, your speech, your actions, how you treat others, how you act in front of others.

I could speak hours on this subject, because it is of the Greatest Importance for the foundation of Sainthood. I add to this, 'So be it.'"
