

“**T**here are Many of Us present because of the Miracle of this Gift of The Father’s Love for human life. This creation was accomplished with much good in mind, much Divine Love, based on all issues of what mankind, human life, would have the benefits for, and the abilities to practice.

Human life was created with many Gifts. The Gifts were to give to human life the foundation, the basics of what would give human life the Goal for which it was created. Logic should tell to all degrees of intellect that as this creation was endowed with so many Gifts, to be able to do, practice, and follow all The Father Willed, because of the *Souls* that basically are the *recipients* of all that an individual produces, practices and instructs others to better understand, to more fully comprehend how important it is for the privilege of being created human.

Throughout the world, there are millions of individuals who do not know the Greatness of this Gift, because they are not instructed to fully understand that they have the ability to return to their Creator, forever and ever and ever; nor is it the logic of how they practice their daily ways of life, understanding that morality is of the utmost importance, because their *Soul* is the *recipient* of all they think, say, do, partake in.

I speak differently, I know, but human logic says that the basis of truths is the foundation for the purpose that gives hope, strength, and allows the individual to reach the Goal they were created for, ***Sainthood.***

I speak differently today, because there are so many individuals who are *never instructed, or even introduced, to what a Divine Gift of Love they walk with every moment of every day.* Needless to

say, there are so many ways to describe why The Father created human life and the goals for which He encourages human life to reach for. Most human beings, in fact, very few, realize or fully understand that the **Greatest Goal for human life** is the Goal least understood by man. It is called **Sainthood**.

The mentality cannot always innately feel that what they say, they think, they do, they feel, is evidence, or evident in how they walk each day, but **that is why the Gift of Divine Love has been given to the world**, repetitively speaking on why human life should accept all that is morally sound, practical, logical, and valuable, because their *Soul* is the *recipient* and will one day be given a place close to The Father for having practiced purity in a degree that gives to the Soul, the Soul's desire to return to The Father, be close to Him, even if It is not declared '*Sainthood*' by particular men.

As I close My Words, I do it with much Love. Some say, 'Why does He use the word '*love*' so much?' Because *love* draws together a feeling of security and of meaning, and that in its own way gives strength, hope and assurance that it will not end momentarily, but will live on and on and on, beyond human understanding or imagination."
