

SAINT ALPHONSUS LIGUORI

“I am Saint Alphonsus Liguori.

It is normal to the human mentality to want to see, and many times possess, what is not just attractive, but pleasing to some area of their life. A diamond is not always used for what it was designed to be. The word ‘*diamond*’ is of the utmost importance for human beings to hear about and to see, no matter what degree it is termed ‘*expensively*’.

As I speak today, each human being born has a Goal. Needless to say, it is rarely spoken about, because the ***magnitude of human life is not fully understood.***

Let Us take now a baby in the womb of a mother. Sometimes it is a happy time, other times unhappy. Different circumstances determine how an individual or two individuals feel about this.

Today as I speak, I know it is different, but it is important that logic be more defined in how people act, how they speak, how they associate with each other, and how they practice their behavior patterns and their willingness to agree or disagree.

Children are not being instructed on the importance of their mentality. Much more could be done about this at a very young age, because ***logic is innate in the human mind, and logic has a more definite understanding in how it is spoken or how it is shown to be.***

At a given time in growth the human way, a child learns that

there is a Heaven, Hell and Purgatory, but all is not described regarding their behavior, or there are Rules that are put into script regarding sin, but these Rules are not always understood according to the age an individual is, or according to what they have been instructed on.

**S**o many youngsters are confused, because those who are in charge of them do not have the mental capacity of seeing, of sensing, or the ability to instruct on the Beauty of all there is, and what a Gift human life is, in how it should be handled according to the right and the wrong, the good and the evil, the pure and the impure actions that can occur in the human way.

**O**h, there are many rules written, but not always translated properly. Sometimes *dominance* is the factor. This, to some who are hearing the words, causes them to cast out what they feel; some of them, the words are put so lightly that it does not make things realistic, so indifference occurs. Granted, human beings of all ages have personalities, natures, and many ways of how they use these things, but so many times the soundness of morality *does not register*, and it is cast aside for a very menial description of what things are all about.

**I** will close My Words. I could speak hours on end, but with all that is known regarding the Commandments of The Creator, the Commandments can be clearly spoken and can be described in a manner, degree and way to the young, giving them the strength to understand that ***in the creation of life, The Father and Those close to Him, planted the Seeds of Divine Love and Divine Plan, so there should be no confusion, no distrust, only sound explanation on the Importance of Divine Love.***
