

## OUR HEAVENLY MOTHER

**“I am your Heavenly Mother.**

**This Gift that The Father has Willed human life to hear, to read, is a Gift Beyond what It is assumed to be. Divine Love is Above and Beyond what the human mentality can perceive It to be.**

**The Father, in His Love for human life, through time, has used certain individuals to walk in a path of instructing others like himself or herself, to more fully understand What The Father Wills human beings of all ages, backgrounds, degrees of intellect and mentalities, to begin to understand what a Precious Gift human life is to man, thus giving it so much more than anything else created has.**

**You live in a time wherein many human beings are involved in not just designing, but creating many things to give to human life help and future items to give them an advantage mentally, mechanically. It is called ‘progress’.**

**Now I take you back several years when these things that are now ordinary, natural, practical, useful, were never thought about, and as I take you back, I also remind you that in these times, so far from the later stages of life, were important to those who lived then, because the challenges and the status of learning was addressed step by step, to lead human beings to this time in life, mentally, psychologically.**

**Now I address this subject spiritually. In the time that My Son walked the earth, He spoke in a manner, a way, a degree**

understandable, constantly instructing on why human life was created and what a Great Gift it was, because it had a Future to it, a Goal to it, a Reason for it, and a Divine Love in it, beyond what the human mind could perceive It to be.

**S**ince the creation of human life, the *beginning* let Us say, step by step was taken, addressing subjects that would be understood, and the individuals living at that time would be capable of using, learning more things about what existed, why they were created. The goals were mentioned often, but today you live in a time wherein so much seems to be greater than any other time in the history of human life.

**A**s I speak now, I am watching some children. The ages, I would say, would be between ten to fifteen. Granted, they have been instructed on subject matter and updated manners of living, but I am going to ask a question. *How much is spoken about regarding their Soul, the Future for their lives to one day be a natural way of life for them to remain through their Soul, bearing their name?* Should not there be more spoken to all ages, reminding them that though all human life has been created and has advanced physically, mentally, but the important question here is: *Has human life become more morally understandable in regard to how it is used, especially in connection to, along with, the Guidelines of the Commandments?*

**M**orality is a very Important Part of human life. Superiority seems to be what most think about, or popularity seems to be advanced to the point where some will do many things just to be popular, *ignoring what basic facts were followed.*

**I** speak so differently at this time, but hopefully it will awaken the minds of some who are in charge of the young.

***Example*** is one of the most important things; also, ***moral tradition*** is a great method of giving to the young something to think about, something to more fully understand that life is not something wherein all things practical or impractical, just or unjust, should be practiced until it is looked at for how it affects the Soul of those who are making these decisions, and those who are the recipients of an individual's motives, practices and decisions.

**I** know I have spoken differently, but I promise you, every Soul that is placed where The Father Wills It to be, He wants It returned to Him and for It to be a '*Saint*'."
