

“**T**here are Three of Us where *this little one* is present.

Every human being possesses a Guardian Angel, but many do not take this as a Statement of Truth, only what they call ‘*fiction*’ or what history mentioned a long time ago.

To be created a human being is a Gift of Divine Love, thus giving to it many abilities that other things created do not have. First of all, *the human mentality* gives strength in many ways. It is in many ways a *treasure* to be able to have *the Gift of memory, the Gift of speaking words* that others do not know, other things cannot imitate. When I said ‘*others do not know*’, I meant those who do not have the mental capacity, due to some illness that they are the victims of, or living situations that robbed from them, *learning*.

We are showing *this little one* a corner on a street. There is no one there. She said, ‘Why do You have me looking?’ We smile at this, because she is always aware of something that should be different than it is shown to her when Our Words are spoken through her.

Suddenly, she is aware of many children running, jumping, and having what is called ‘*human fun*’. This pleases her, because of her sensitivities in so many areas of life as a human being. We are showing her some men walking up to where the children are. She innately is concerned. This is her natural instincts. The men are going by. She is relieved.

The reason I have spoken thusly, is to bring to your minds, to alert you ***to be aware of more than you feel necessary.*** I do not say ‘critical’, just aware. You live in a time like many other times;

more caution has to be followed morally, psychologically, physically. **Morality** is a word. It has a meaning, but it does not always have an open reminder to many individuals regarding its characteristics, or what it draws attention *for, to and how*.

There are Many of Us present, because to be created a human being is the Greatest Gift in the human way that can be received. Human mentality is essential. Human abilities are beneficial in many ways. Human endurance has within it a better source of timing in what and how to do specific things.

I know that I have never spoken like this before, but I assure you, it is to guide those who read the Words, because of so much that occurs that is not always *obvious* as wrong, just acceptable, but it is Important that more logic should be used on what an individual chooses to be a part of, or to practice mentally, morally, psychologically, physically.

The Creation of human life was a Gift Far Greater than it is seen to be. It is taken for granted in so many ways, but it should be looked at with a deeper understanding of its purpose and the privileges it gives to human life, human living, human ideas, human practices, human goals.

Needless to say, hours could be spent on this Subject, because human life has so many privileges and so many talents, strengths, to be able to partake in so many things, giving to human life a deeper understanding and a more practical view of the '*Importance*' of human life. It was created for many reasons: one main reason was to share with The Creator of All Things, the *Gifts of sight, of speech, of learning, the Gift of breathing*; the list is endless.

You have never heard Me talk like this before, but I assure you, it is to give you a fuller understanding of ***the Importance of being***

MAY 23, 2005 AT 2:03 P.M.

born a human being, and to remember that you have the privilege to accomplish many things that are unlike what you saw them as before. I could name them, but as each human being has differences in thinking, in sharing and in points of view, just remember: ***You were created a human being, and The Creator shares with you His Divine Existence in everything you think, say and do.***”
