

REVELATION DELIVERED THROUGH FRANCES M. KLUG
ON MAY 2, 1997 AT 2:03 P.M.

OUR HEAVENLY MOTHER

“The Father has given to mankind a Personal Gift of His Divine Love, a Gift allowing mankind to more fully understand what a Precious Gift human life is.

In the design of human life there was a Great Purpose. It was to one day share Eternity with Him. The design of mankind was special, because even when it was first designed, the individual was cognizant of a mind, the ability to communicate, and the ability to take care of the physical through food, exercise, and the desire to learn emanated from the mind.

Children are not learning what a beautiful Gift human life is, because it has so many areas greater than any other living thing, to learn scientific understanding, helping human life to live in a greater degree than any other living thing.

In the beginning, human life’s first communication was different than it is today, but today there are so many advantages for mankind to more fully understand that human life was not created just for the moment, the time, but within it, it was given the knowledge and the ability to use all that human life was, to be one day returned to The Father for All Eternity. Now this does not say that in the beginning there were no Souls in human life. There were, and each era of advancement instructed mankind on a greater knowledge that the human mind was capable of.

When a child is born, the child does not hold a conversation, but learns to use what is available to them in how to speak, and what an advantage it is of communication.

There are so many different opinions by so many men, women and even children, on what human life was created for. Some feel it was just to be on earth a while, and then there was no real understanding of what was to come.

When The Son of God first began to teach men of high learning, the foundation for which human life was created, they were in awe of the words, and the hope in the words, because up to this point there was no such explanation, so mankind theorized, and also realized that there was good and there was evil, there was right and there was wrong.

Time has given to mankind so much more information, so much to think about and learn to recognize as human life to be special, and have a Great Goal. Think about this: Most human beings recognize success in some form, some way, and it draws their attention to how to gain this success, how to improve what they are mentally, physically. Some are more inclined to want to improve spiritually, because all of human life does not feel the desire to become a Saint.

The Father gives to the world a particular form of encouragement that is through men and some women who feel the need to instruct others on the Goal for which human life was created.

Now I take you back in time, when God's Commandments were introduced. Much preceded this very famous, great time in the history of mankind. Before this the rules that mankind followed were rules that they decided were acceptable, were applicable, were necessary, and were advantageous to the time that they lived, giving to human life more strength, more understanding, more reason.

When the Commandments of God were delivered, needless to say there were many rejections, because these Commandments were

binding to ways they were not used to. They felt that the Commandments, though logical, robbed them of much of their freedoms. Acceptance of the Commandments of God did not happen overnight, and each time The Father gives to the world an Important Message, Instruction, it takes time for It to be seen as improvement, advantageous, and more understandable, because It has reasoning that is not ordinary, due to the fact that lifestyles of human life form habits, and these habits become so ingrained that any new format for living takes time for mankind to adjust to.

This Beautiful Miracle of The Beloved Saint Joseph hands to mankind a Light that, in so many ways, is enlightening mankind in all races that human life, in the dignity it was created, has a purpose for its creation, and that mankind has the choice to respond, using the basic Commandments of God as Rules, to not just know, but to follow in their fullest measure.

We hear so many say, ‘The Commandments are binding and I’m used to freedom.’ The Commandments do not restrict freedom, but the Commandments do, in many ways, give reason for every individual to see the importance for which they were given, and that is for mankind to follow purity of mind and body, for the sake of the Soul that is to be returned to God as a Saint for All Eternity.

This is not difficult for mankind to understand. It is too logical to not understand, because mankind is constantly aware of the desire, the need, the hope, the concern, to reach goals that are beneficial, and there is no better goal, no greater goal than to accept The Father’s Will, practice following in all ways, all manners, the Commandments of God in their fullest measure, because they were given to help men, women and children to desire to reach the Goal of Sainthood at the time when the human life would reach its end.

So many, all through their life, struggle to reach goals for

success, socially, mentally, physically, monetarily. It is important to them. It makes life more interesting. THERE IS NO GREATER GOAL THAT MANKIND CAN REACH THAN TO BECOME A SAINT WITH GOD IN HEAVEN. So be it.”
