

REVELATION DELIVERED THROUGH FRANCES M. KLUG
ON MAY 25, 1999 AT 1:10 P.M.

SAINT THERESE OF LISIEUX

“I am Saint Therese of Lisieux. There are many times We speak through this little one, and do not announce which One of Us is speaking. A burden of this nature, this degree, is far greater on a human being than any other human being could understand, mentally, physically.

Today I have been requested to encourage those who hear this Message of Mine, to spread throughout the world All that has been delivered from The Divine. We oftentimes hear a lack of courage regarding this personal act for each human being to undertake, but how else can the world learn about the Soul that each human being is the custodian of?

Those who have taken on the task of so-called spiritual help, guidance, instruction, are not delivering to individuals the strength to more fully understand the knowledge to comprehend that human life is special, because within it The Creator placed a mentality, a sensitivity, an innate understanding that all things human, physical and educational are from a Higher Being.

When We hear individuals remark about someone they have heard of, or they know, saying how intelligent the individual is, you rarely hear them say, if ever do you hear them say, that that individual speaks totally God's Way.

Mankind knows prayer is important, and if I were to give you an accounting of all the prayers that are spoken each day by mankind throughout the world, you would be shocked at how low the number would be. Numerically it would be far lower than any other discussion mankind would be involved in.

Granted, a lot of things that mankind would speak would shock a

moral human being, so it is important that these Messages delivered by Many of Us travel throughout the world. No matter what language, no matter what degree of education, great or with none at all, it is important that each human being become aware of this Gift of Divine Love In Which, Through Which, With Which So Much Is Delivered, giving to mankind Facts, Directions, and a way to live, because of the Importance of the Soul that each human being is the custodian of.

We hear some say, 'If I have a Soul, I never feel It; where is It?' One's conscience, one's innate understanding of purity over impurity, truth over lies, modesty over immodesty, morality over immorality, are distinct forms of recognition that in decisions human life has responsibilities. So be it."
