

REVELATION DELIVERED THROUGH FRANCES M. KLUG
ON OCTOBER 26, 1999 AT 1:26 P.M.

SAINT ATHANASIUS

“I am Saint Athanasius. The subject I am about to speak on is important in many ways, spiritually, psychologically, mentally, morally and humanly.

Today if you and others were going to take a poll throughout the world, or perhaps just locally where you live, making one of the questions, ‘How and what is your belief in a Divine Creator?’ thousands, in listening to the question, would find it difficult to answer in a logical way, because it is a rare thought to men, women and children of all ages, to wonder what the moral conditions throughout the world would look like if they were described in print, to the letter, to the degree, that morals are practiced in this day. Morals are not thought about in a daily manner of thinking, because the Commandments of God are not thought about in a daily manner of consideration.

Many of Us Saints, in hearing different discussions, would like to encourage human beings to put into complete script the Full Meaning of each Commandment of The Father, so everyone reading Them could analyze their own practices in their daily life, regarding how they think, how they respond morally, mentally, psychologically, spiritually, physically, to all that occurs to their mental, physical, moral, and psychological understanding.

Today there is so little spoken about reminding human life of the responsibilities, because of a Portion of The Creator that only human life is the custodian of from the moment of conception. Why this is so difficult for so many to accept is a sadness, because in the creation of human life there were many gifts instilled, automatically giving to each human being benefits that no other living matter or thing is the custodian of. First of all, all the talents that reach into many important subjects are not just attractive, but encouraging to many who learn about them, giving to their individual life an

in-depth understanding of a subject that creates more interest, more abilities to understand what no other living matter or thing is able to understand.

The few things I have mentioned should never be ignored, because human life obviously has an in-depth dimension of being able to conceive much logic, much information from all that is available to the human mind; thus, this alone should remind human beings that they have a particular Gift of Divine Love that they are responsible for, and innately know that purity of the mind reflects within an Inner Portion, not seen, not felt, but obviously present, namely the Soul that no one sees, but no human being is not conscious of what is morally correct, morally impure, and that the results of sound morals has to be recorded in a manner and a way not obvious, as does immorality.

If these facts were not valuable facts based on importance, each human being should ask himself or herself, 'Why, how, do I know why my decisions are pure or impure, right or wrong, pleasing or displeasing to an Entity I have never seen, and yet inwardly I know Exists?'

As I leave you, I beseech you to pass these Words on, to awaken in others the necessity to understand that as human life was given the gift of decision, there was an important reason, purpose for this gift, and each human being is responsible to The Creator for all they do, they think, they say. So be it."
