

## “WE MUST REMEMBER”

**P**hysical activity is normal from birth on. That is why it is so important for people of all ages, all cultures, all creeds, to remember that a healthy body is important to every living human being.

**A** healthy moral mind is equally and/or even more important. That is why sound moral values and sound moral standards give strength to every fiber of human living, because these things help mankind brave many decisions when evil tries to step in and cause, not just an unhealthy atmosphere, but a condition that seriously affects the mind, the body and the Soul. Is it broadmindedness or indifference, or a lack of understanding to the need, the value, the importance, and/or the necessity to morality?

**H**ow can so much indecency be justified by so many people? Whatever happened to conscience, fear of God, and/or just plain normal tendency to want what is good, to do what is right, and to condemn what is wrong?

**I**sn't the individual responsible for their behavior? Isn't it normal to abhor evil and/or to reject meanness, indecency — OR — has satan actually obsessed and possessed so many people? What a horrible thought.

**G**od's Commandments, since Their inception, have been obvious as the Guidelines for mankind's choice of right over wrong, truth over untruth, purity over impurity. This, in its very essence, proves the Existence of a Higher Being, not just for spiritual understanding, but for the daily practices of human life.

**H**uman nature enjoys success and has an innate desire to succeed

in many ways, for recognition, for being an exceptional human being. This, in some ways, has a comparison to our Soul, for as success is an innate desire, imagine the ability to hand back to God our Soul, as a Saint in His Realm forever.”
